2020 Kitchen Brochure

ABOUT US

Adrian Core have been designing and creating handmade, bespoke kitchens and furniture since 1994. As kitchen and furniture designers and makers, our emphasis is upon creating solutions for clients homes and businesses that are tailored to their individual taste, requirements and lifestyle.

As well as fine craftsmanship, we are able to offer intelligent bespoke, storage designs for your home and commercial installations. Our bespoke service offers you a freedom of choice like never before meaning your new kitchen, home or office solution can be

as tailored as you need. Using only the finest materials, we pride ourselves on creating unique home and business solutions that will remain timelessly beautiful for generations to come. Our reputation is not only built on quality craftsmanship and service, but on excellent build quality where only the finest sustainable hardwoods are used. At Adrian Core we're here to help you all the way, that's why delivering and installing your finished commission is all part of our service.

Design it, build it, install it with Adrian Core.

DESIGN IT, BUILD IT, INSTALL IT **WITH ADRIAN CORE**

Layout

The kitchen triangle is one of the most important considerations when it comes to designing your kitchen, so getting professional advice on your three key areas, along with looking at the best set up for your family's lifestyle is super important. Planning your layout with sink, refrigerator and heat source at the fore front of your mind is key to avoiding problems further down the line. Speak to us for honest advice on the best layout for your home and look at the many design possibilities there are to choose from. We promise you'll be spoilt for choice !!

Textures

Textures are so important when it comes to a new kitchen design helping to communicate design style, temperature feel and tone whilst helping to differentiate different surfaces and objects. Worktop choices including Minerva, Corian, wood, stone, laminates and quartz are just a selection of the options available to you. When it comes to frontages, we can offer handlaid veneers, spray paint gloss detail and laminate finishes. Pop into our showroom to discuss how we can help with your kitchen design and see some of the many choices available to you.

Lighting

Introduce lighting that compliments the look and feel of your home, taking advantage of exposed brickworks, distressed woods and statement walls. With a choice of lighting to compliment all styles of kitchens, adding those finishing touches that often become the focal point of the room is a must.

Splashbacks

Often one of the first design elements to catch the eye, the 100% recycled splash backs that we use in our bespoke kitchen builds are the perfect accompaniment to the latest colour trends and statement walls. The high gloss and contemporary finish, coupled with its steam and water resistant capabilities make this an easy choice for many home owners. This attractive alternative to tiles offers protection against splatters and stains with a touch of style.

Handles

Adding handles that add texture to your furnishings whilst complimenting your design is just as important as choosing your kitchen cupboard style, helping to compliment your decor and overall feel of the room.

Worktops

Making the right worktop choice based on best use, look and durability is so important when it comes to planning your kitchen. Working with both Corian and Minerva, we'll talk you through the best-suited options and provide you with all the necessary aftercare advice you could need. Delivering a luxurious finish, these practical, solid worktops make kitchen aspirations become a reality.

SUSTAINABILITY

FROM THE CORE

Working with sustainable products is more than just about planning and design, it's a way of life for us at **Adrian Core**.

Whilst we're all working towards a more sustainable environment, we want to make sure we support eco-friendly living as much as possible.

Reduce Carbon Footprint

Refurbish, reuse and recycle is part of our sustainability ethos at Adrian Core. All of our materials are sustainably sourced and we heavily research our materials to ensure they meet our sustainability criteria. All of our timber is FSC certified and we strive to maximise yield to minimise wastage and impact on the environment.

Bespoke Cabinetry

Choosing your desired wood for your new kitchen is all part of the service and what's more, we can even give you details about its journey and where it was sourced. We can create bespoke cabinetry units to suit all budgets and designs in a choice of colours, shapes and sizes, so if you've seen something you like, let us know.

Packaging

One of our primary focuses when it comes to reducing waste is to avoid any unnecessary packaging and where possible, we use bio-degradable packaging for our deliveries.

Lighting

- Requiring much less wattage, our LED light range is now unto 80% more efficient and longer lasting than the CFL or incandescent light bulbs on the market.

Appliances

We encourage our customers to shop sustainably offering support with the sourcing of energy efficient kitchen appliances, that deliver the highest energy ratings. Talk to us about our SMEG appliance range and how we can help source as part of your kitchen project.

LESS IS MORE

In a county where location is often more important than square footage, getting smart with your space is at the forefront of many consumers minds. The way we live is changing, so adapting to live in smaller spaces with our around the clock lifestyles, means our homes have to be this multi-functional hub, fit for all purposes. Compact living means thinking outside the box and ensuring you're making the most of your living space with clever storage solutions, integrated audio and even sliding doors. As well as freeing up floor space and maximising areas of your room, achieving smarter living can tidy our minds as well as our living space.

Here are some examples of smarter living and how it could help you in your home.

Sliding door solutions

Perfect for multi-functional living space. Where we would normally require 7ft of unobstructed space to open and close, pocket doors simply disappear into the walls, maximising available space.

Corner swing cabinets

Protect your cabinets from slamming doors, with the swift, fluid movement of the corner swing unit. Reducing the need for searching and stretching, this innovative storage solution means your kitchen contents are never out of reach.

Flymoon sliding cabinet

Boasting a 20kg capacity, the flymoon is an ultra stylish storage solution that provides clearer cabinet visibility and easier accessibility.

Pull out cabinets

This integrated pull out unit boasts a half wine rack, half storage unit design. The unit pulls towards you, allowing you to access its contents from both sides. Designed vertically, rather than horizontally, these pull out storage units are a fantastic solution for smaller kitchens.

Pull out storage

Suitable for both pull out larder units and conventional base storage units, this easy to access pull out storage unit means there's no excuse for wasted cupboard space. As well as offering organised pull out shelves, this design eliminates the need to reach into the back of your cabinets.
